EDUCATION

Johnson College | Scranton, PA
A.S. in Information Technology
Spring 2019

CERTIFICATES & CLEARANCE

Top Secret/SCI-CI Security Clearance

CompTIA Security+

AWS Certified Cloud Practitioner

AWS Solutions Architect – Associate

SKILLS

- Troubleshooting
- Documentation
- Vulnerability Management
- Problem Analysis and Resolution
- Critical Thinking
- Communication

PROFESSIONAL SUMMARY

Resourceful, multi-talented, solution-oriented, and highly analytical IT professional with a wide range of skills in systems installation, configuration, upgrading, and maintenance. Skillful administration and troubleshooting expertise for a range of Microsoft OS, Windows Server, and UNIX/Linux products. Proficiency in grasping new functional concepts quickly and utilizing them in a productive manner.

AREA OF EXPERTISE

- Understanding of Amazon Web Services (AWS) platforms, including EC2, Route 53, CloudFront, CloudWatch, and S3. Able to integrate services to build efficient cloud solutions.
- Knowledge of Windows Server (primarily 2012/R2/2019/2022) including Active Directory, DNS, Group Policy, DFS/DFS-R, Hyper-V, and DHCP.
- Hands-on experience with commonly used networking tools/devices, including routers, switches, APs, firewalls, LANs, and WANs.
- Experience with classified information system Cyber Security tools and technologies (Nessus/ACAS, SCC), collaboration with Cyber Security professionals, contributing to System Security Plans, and drafting network diagrams and topologies.
- Building and deploying systems with hardened operating systems using Secure Host Baseline for Windows Clients and Servers.
- Skilled in Patching Windows/Linux machines using WSUS, SolarWinds, Microsoft Catalog, and SCAP tools.
- Familiar with mitigating vulnerabilities from compliance reports. Experience with auditing tools such as ManageEngine.
- Able to automate repetitive or administrative tasks using scripting languages, such as Bash, or Python.

WORK EXPERIENCE

IT SYSTEMS ADMINISTRATOR

Sep 2019 – Current

ARETE ASSOCIATES

- Installed, configured, and managed Red Hat Linux HPCs in production and development environments. Configured and maintained network services such as NFS, Samba, and Apache/Nginx. Implemented security measures, using services such as firewalld, MFA, SELinux, LUKS, and user permissions, to ensure system security.
- Administering AWS environments creating and maintaining Workspaces along with provisioning EC2 Images and Volumes.
- Built, configured, and presented a classified network to a DCSA inspector that led to the ATO for the project.
- Maintained a Linux software baseline by installing, upgrading, and testing compatibility with software like Anaconda, TensorFlow, CUDA, Modtran, and Matlab.
- Supported AI efforts by building, configuring, and flashing NVIDIA Jetson's using SDK Manager and third-party software for the carrier board.
- Helped end users with more severe technical difficulties that required a higher degree of specialized service and a longer response time.

IT TECHNICIAN

May 2018 – Aug 2019

COMPUTER VISIONARIES

- Utilized strong problem-solving and communication skills to suggest a change in workflow to increase the efficiency of service.
- Resolved any networking issues and incorporated new systems into existing networks while maintaining security and transparency.
- Identified and assessed network needs, reviewed, and worked on network performance enhancement, and made regular backups
- Focused teams on objectives and tracked progress to ensure milestones were completed on time, and with the desired results.
